SKILLS

Languages:	Python, Java, C, SQL, PL/SQL
Tools/Platforms:	MySQL, Tableau, Power BI, Git, Linux, Docker
Libraries:	Matplotlib, Pandas, Numpy, Scikit-Learn, Seaborn, XGBoost
Soft Skills:	Adaptability, Collaboration, Time management

INTERNSHIP

Infosys Springboard 6.0 Feb 26 – Present

Data Science Intern

- Engineering 'Air Aware', a smart air quality monitoring system using Python and models like XGBoost, ARIMA to predict pollutant levels with more than 92% accuracy.
- Quantifying environmental impact by identifying high pollution zones and providing actionable insights that could potentially reduce exposure by up to 20%.
- Designing and deploying an interactive dashboard using Streamlit, enabling users to visualize historical trends and receive real-time AQI alerts.

PROJECTS

MediQuest – Medical Chatbot Jun 25 – Aug 25

- Developed a RAG-based chatbot to analyze medical report PDF's and generate contextual insights using Sentence transformers.
- Implemented RAG pipeline with local LLM (Phi-3 mini via Ollama), sentence transformers embeddings and scalable ingestion pipes.
- Monitored model performance regularly to improve retrieval accuracy and response speed by ~20% through optimized chunking and embedding strategies.
- **Tech Used:** Python, Langchain, Ollama(Phi-3 mini), Streamlit, FAISS

Road Accidents Data analysis and Visualization Feb 25 – Mar 25

- Analyzed multi-year Indian road accident dataset using Python, uncovering key severity trends, casualty rates and high-risk conditions.
- Applied statistical testing to identify significant factors such as weather, lighting, and road type affecting accidents and causalities.
- Built an interactive Power BI dashboard with forecasting and drilldowns, enabling data-driven insights that could support strategies to reduce accidents by ~15%.
- **Tech Used:** Python, Power BI

VoiceTrans – Automated Language translator Oct 24 – Dec 24

- Programmed a Python-based voice translator that converts English speech into five regional languages and vice versa with real-time text and audio output.
- Integrated speech recognition, translation, and text-to-speech modules within a Tkinter GUI to enable seamless voice-driven interaction.
- Enhanced translation efficiency by ~20%, improving accessibility and enabling faster multilingual communication for regional users.
- **Tech Used:** Python, Tkinter, Speech Recognition, Python translator

CERTIFICATES

- Generative AI Professional | *Oracle Cloud Interface* Oct 25
- Quantitative Research Job Simulation | *JPMorgan Chase - Forage* Oct 25
- Data Visualization Business Insights | *Tata - Forage* Sep 25
- Microsoft Power BI Data Analyst | *Coursera* May 25

EDUCATION

Lovely Professional University Phagwara, Punjab

Bachelor of Technology, Computer Science and Engineering Aug 23 - Present

CGPA : 8.52

Sagar International School Erode, Tamil Nadu

12th – Percentage - 88 Mar 22 – Mar 23

Sagar International School Erode, Tamil Nadu

10th – Percentage - 91 Mar 20 – Mar 21
